

## Vehicle Film **Product List**

A brief description of some of our most popular vehicle films.

### **G05 – 5% Very Dark Smoke**

Our Darkest non-reflective film gives excellent privacy and eliminates glare. It's mostly used for the rear window of commercial vehicles as it blocks vision in but not out, allowing the driver full use of the rear view mirror. Creates a rich dark appearance to the glazing.

### **G20 - 20% Dark Smoke**

G20 is most popular medium film. Reduces a high percentage of Glare, protecting occupants and interior fabrics whilst also giving elegant privacy and style.

### **G35 – 35% Medium Smoke**

A light non-Reflective film that gives a soft tint to the windows. It gives an element of Glare reduction and privacy.

### **G50 - 50% Light Smoke**

Our Lightest non-Reflective tint.

### **Reflective Film**

Give a reflective mirrored appearance that blocks vision in but not out. Allowing the driver full use of mirrors. Available in an array of colours and grades: Silver, Grey, Blue, Green, Bronze and Gold.

### **2 Tone Film**

Give an eye catching appearance. Available in an array of choices: Silver/Black, Blue/Black & Green/Black.

### **Safety & Security Film**

Combined solar and safety films, Available in both Reflective and Non reflective films. These films are designed to give maximum protection whilst also giving solar protection and privacy.

### **Clear UV Glass Film**

A film available for customers who are looking for protection from the damaging effects of UV rays but who do not wish to tint the glass. This is an optically clear film that does not visibly alter the appearance of the glass.

### **Black Out Glass Film**

These films are ideal for situations where total privacy is required. Blocks visibility and light, in and out of the glass. Available in White, Black and Silver
